

## CUTTING

### with a retractable blade (utility) knife

Be sure to lock the safety screw on the knife before beginning to cut.

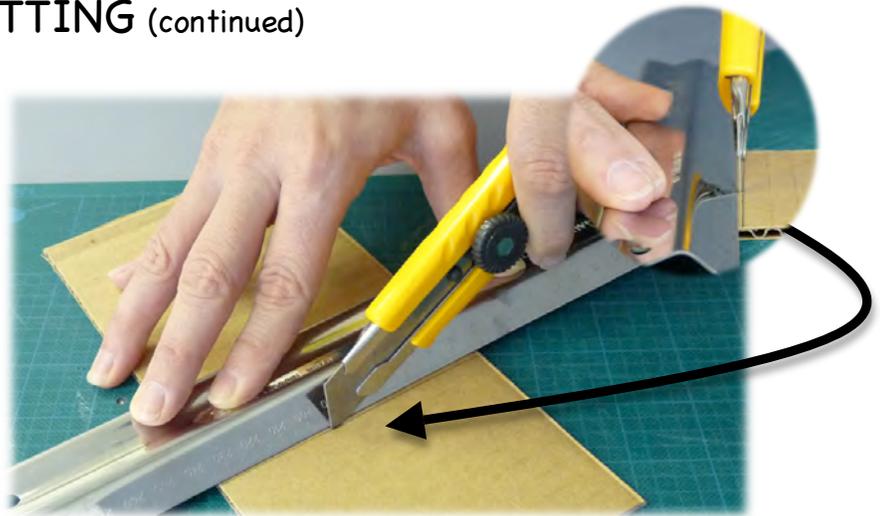

1. Place the cutting mat on the work surface to protect it.
2. Place the part to be cut.
3. Use the safety ruler to carry out the cut.

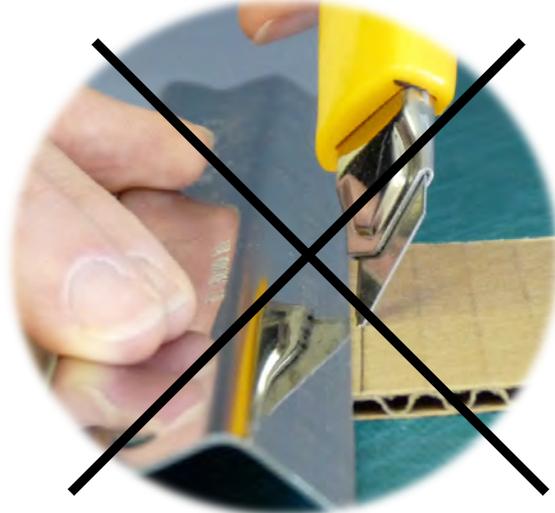

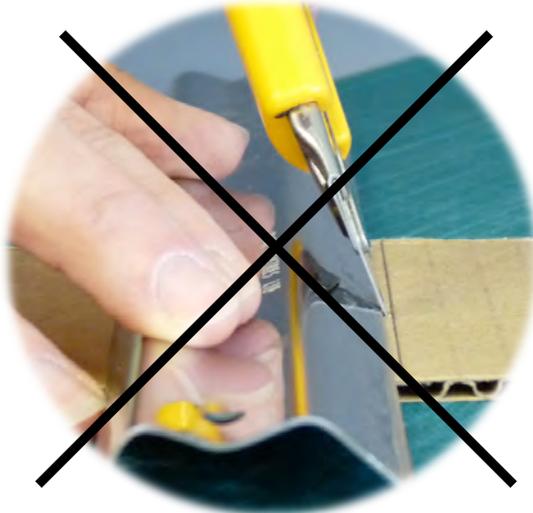

## CUTTING (continued)

1. Position your fingers in the groove of the safety ruler and hold it on the part to be cut.
2. Ensure that you have the optimal cutting angle with the retractable blade knife.

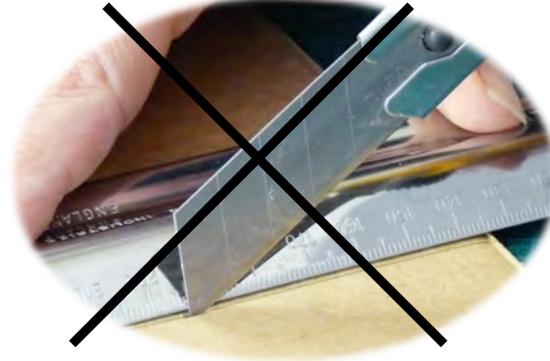

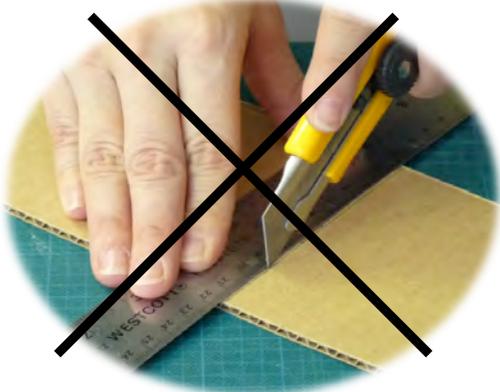

### Incorrect positions for the retractable blade knife

Never use a ruler meant for measurement to make a cut.

The blade must not be too far out when cutting.

## CUTTING (continued)

Do not place yourself in the trajectory of the blade.
