

## Safety technique

### How to safely smell a substance

\* It is not recommended to smell noxious vapours from products, since these may cause many negative effects to your health.

This is what you must not do with chemical products.

## Safety technique

How to safely smell a substance  
(if it is necessary to do so)

**1- I slowly approach  
the product to be  
smelled.**

**2- Using a waving  
motion with my hand, I  
direct the vapours of  
the product towards  
my nose.**

**3- I briefly smell the  
vapours of the  
product.**
